ABSTRACT

InEcA has carried out commercial and noncommercial projects in the field of environmental and social assessment, environmental due diligence, environmental regulating and consulting, public participation procedures since 1995.

Now InEcA is a dynamically developing company specializing in all kinds of consulting services for environment preservation.

The company has a wide experience in the field of environmental regulating and designing: over 400 projects executed for various branches of economy.

We have successfully implemented projects for the enterprises of ferrous and nonferrous metallurgy, mining industry, oil-refining, engineering, fuel and energy; agriculture, food industries, industry of building materials and construction industry, etc.

The geography of the completed projects includes not only Kemerovo region, but many other subjects of

Russian Federation: Krasnoyarsk region, Khakassia Republic, Irkutsk region, Far-Eastern region, etc.

Our company successfully combines knowledge of international standards and Russian legislation of environment preservation and constantly keeps track of their development.

We have stable relations with nature protection departments, scientific institutes, laboratories, and also with the leading specialized environmental organizations in various regions.
